## INTELLIAN ANNOUNCES INDUSTRY'S FIRST MARINE-GRADE DUAL BAND HDTV ANTENNA

*Marine Satellite Technology Leader Delivers All HD and SD Programming in One Dome*

**Irvine, Calif.** – Intellian Technologies, the world's technological leader in marine satellite antennas, announced today the latest addition to its revolutionary line of antennas, the d-Series High Definition (HD) TV systems. Incorporating a radically new, patent-pending design, the d-Series are the only marine-grade antennas that can receive signals from all Ka- and Ku-band satellites. With a small size and very light weight, the d4 and d6 d-Series antennas are suitable for smaller boats through large yacht, and can be installed on bimini/buggy top frames or even small hard/arch tops. The Intellian d-Series HDTV systems are the only choice for a leading satellite TV service subscribers who want to see all available HDTV and sports package programming while underway on the water.

Marking a new era in marine satellite antenna technology, the Intellian d4 and d6 single-dome solutions are the next logical step in at-sea television-viewing convenience. Incorporating Intellian Technologies' sophisticated, patented Wide Range Search (WRS) algorithm to search, find and hold satellite signals and Dynamic Beam Tilting (DBT) technology to ensure clear, interruption-free program viewing even in rough seas or at speed, the d-Series also feature the new Intellian dual Low Noise Block (LNB).

## Product Release

Developed in its Irvine, California office and awaiting patent approval, the Intellian dual LNB technology can receive both Ku- and Ka-band satellite signals, and deliver 35% more satellite TV programming and over 21 times more HD programming than other single antenna, marine-grade products on the market.

"The Intellian d-Series is a revolutionary new solution designed to address issues boaters have had viewing HDTV programming," said Eric Sung, president and CEO of Intellian Technologies. "Prior to its introduction, boaters were limited to a dual antenna Intellian solution or a third-party, repurposed home satellite product that weighs over 200 pounds. Our elegant, rugged and marinized d4 and d6 antennas are the ideal choice for a leading satellite TV service subscribers looking to maximize their on-the-water viewing pleasure."

The d-Series features automatic satellite switching and a plug-and-play interface that allows connection to as many as six satellite receivers. FCC and CE approved, the d-Series, like all Intellian marine TV antenna solutions, meets the company's extremely high environmental testing standards. With a simple, elegant design and compact size, the perfectly balanced d-Series platform also minimizes components and cabling, thus increasing reliability, and making installation and maintenance easier than other solutions on the market. The d4 has a 17.7-inch antenna dish, weighs 25.5 pounds and is housed in a 21.3-inch high dome with a 19.7-inch diameter. The d6 has a 23.6-inch dish, weighs 44 pounds and has a 28.3- by 27.5-inch dome. The Intellian d-Series antenna systems are designed to operate in +/- 25-degree rolls and +/- 15-degree pitches at 45-degrees per second. Operating as low as negative 5 to 130-degrees Fahrenheit, the Intellian d-Series HD antennas are IPx6 rated, shock and vibration proof, and protected by a 2-year parts and 1-year labor limited warranty.

### **Price & Availability:**

The Intellian d4 and d6 d-Series marine satellite HDTV antennas have a suggested retail price of US \$5,995 and US \$7,995, respectively, and will be available for purchase the second week of July, 2009 from authorized Intellian Technologies dealers and distributors throughout the United States. For more information on the d-Series antenna systems visit [www.intelliantech.com/dseries](http://www.intelliantech.com/dseries). ## About Intellian Technologies

Intellian is the world's technological leader in manufacturing a wide range of mobile satellite communication systems. Intellian has established its name with its self-contained satellite antenna technologies, which provides access to high-quality satellite antenna systems in the open sea, even in the roughest weather conditions. Intellian will continue to maintain the highest level of standards and introduce a variety of innovative satellite antenna system for all industries. For more information about Intellian Technologies call (949) 916-4411 or visit [www.intelliantech.com](http://www.intelliantech.com).
